# College Support and Resources

- Office of Technology Mediated Instruction
- Support from the Career Technical Education Program Coordinator to develop a substantially revised program that had existed for 17 years
- Support from Dept. Chair to develop “work-based” models and tech-enhanced/ hybrid courses
- Collaborative design of curriculum and work-based assignments (input from multiple faculties)
- Support to expand work based learning model

# Jobs2Careers

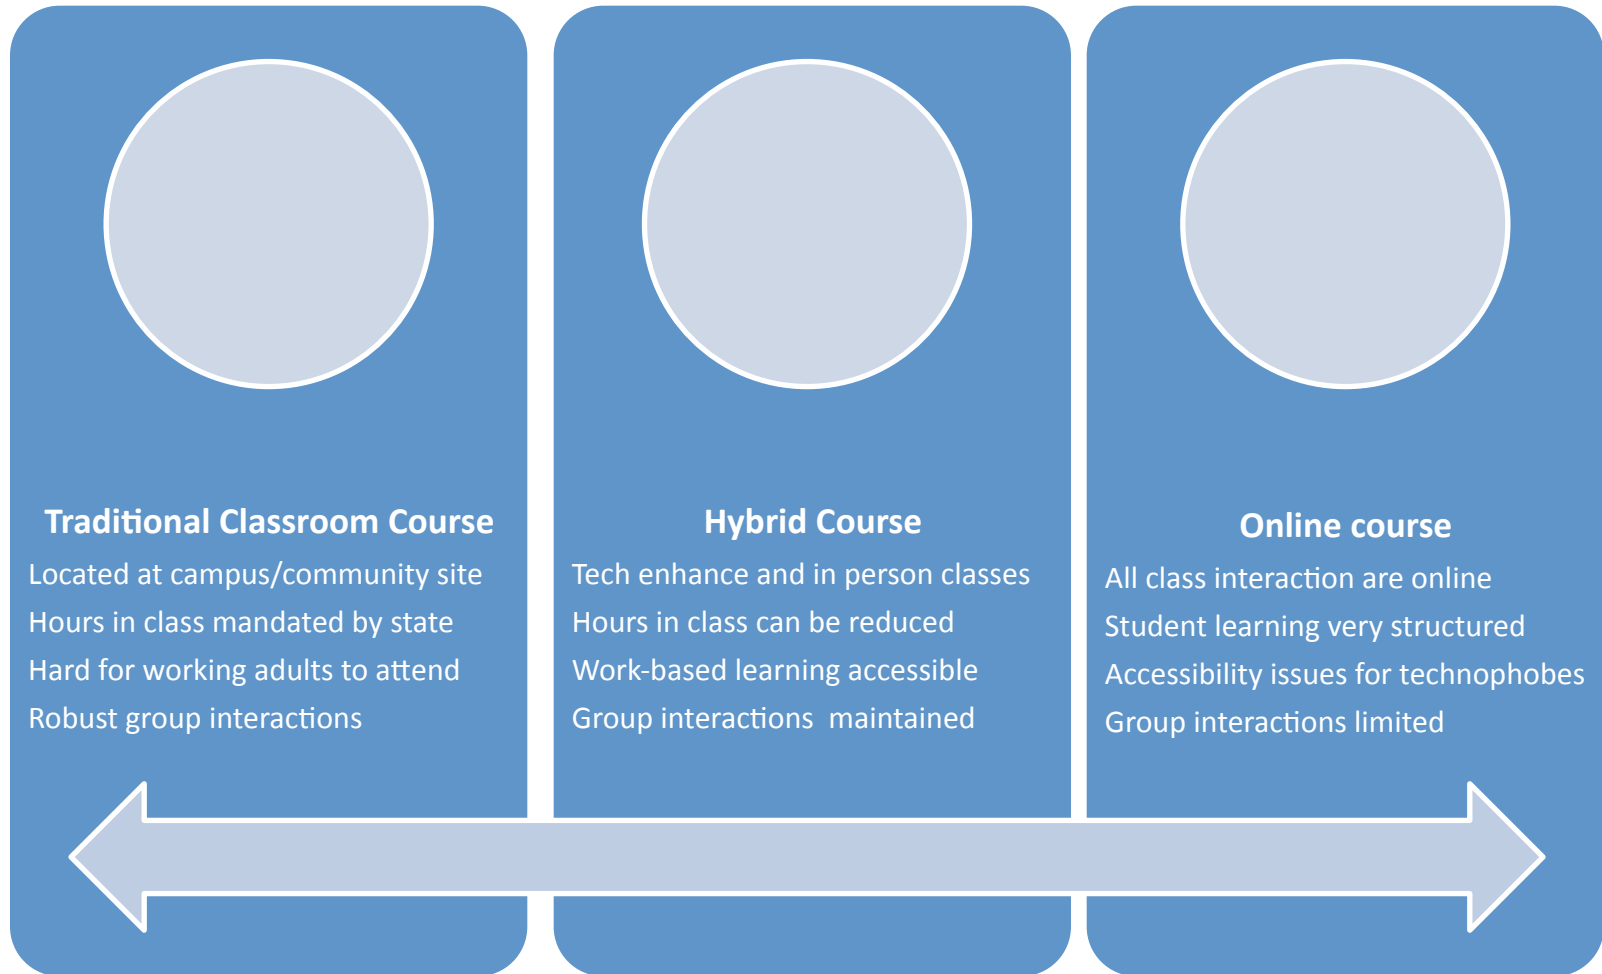

- 2 semester, 17 units CHW Certificate (Employment – Work-based Learning)
- Basic Skills & Transitional Studies
- Professional Skills Training (Soft Skills)
- Office Technology: MS Word (3 Units)
- Community Health Worker Courses (14 Units)
  
- Case Management & Peer Coordinators
- Supervisors as mentors and supervisors
- Change employer policies & practices to support skill and career development

# Hybrid/Tech Enhanced Instruction

- Reduce face to face class time
- Allow for course content and discussion to be online
- Increase accessibility to incumbent workers
- Promote better learning through real life, real work experiences
- Allow for instructor to work with multiple employers and supervisors

# Why Hybrid Instruction?

# System Changes at CCSF

- Shift in departmental views of online and hybrid courses
  - At start of J2C project (2008), health education department had 1 online class (0.5 unit course on Elder Abuse Prevention)
  - Currently, there are 12 units of online/hybrid courses (3 units part of J2C set of courses)
  - Several other instructors are currently planning to develop tech enhance courses
- CCSF modified policies on funding work-based learning course development
- Philosophical shift in experiential learning (integrating work experience with internship)
